12-CHANNEL MIXER WITH DSP AND MATRIX OUT

Compact analog mixer with 32-bit DSP and full duplex audio interface, 99 effects, Bluetooth connectivity, and multimedia player. 4 independently selectable auxiliary output groups with matrix selector. 9-band equalizer on master. +48V phantom power

Reference: ZZMXPRO12

PROFESSIONAL Mixer with DSP multieffects and Bluetooth.

The ideal solution to have everything under control. Great for fixed installations as well as versatile for mobile applications, they can easily manage microphones for a theatrical performance or inputs for a band's concert.

The **2 AUX outputs** guarantee excellent autonomy for live performances as well as for connecting outboard equipment in the studio. Internal effects, **Bluetooth connection**, integrated audio interface, and MP3 player complete the list of features of these powerful and versatile mixers.

Compact analog mixer with 32-bit DSP and full duplex audio interface, 99 effects, Bluetooth connectivity, and multimedia player. 4 independently selectable auxiliary output groups with matrix selector. 9-band equalizer on master. +48V phantom power
