
PRODUCES DENSE SMOKE THAT REMAINS ON THE GROUND, 3000W

Low smoke machine with double 3000W outlet pipe

Reference: ZZFMLOW3000

3000W Low Fog Machine

A professional low fog machine mounted on a convenient and sturdy flight case with 4 swivel wheels. It produces dense fog that stays close to the ground, creating an evocative effect. Suitable for large stages and theaters, it has multiple applications.

The included dual hose allows the machine to be positioned away from the actual output point and provides the opportunity to cover the area from different angles with a single machine. It operates easily and does not require dry ice or expensive CO2 cylinders.

It works with simple nebulized water combined with regular fog fluid. Achieve maximum scenic effect with minimal resource consumption.

Technical Specifications

- Power: 3000W
- Heating Time: 3.5 min
- Control: DMX, Integrated Control Panel
- Fog Fluid Tank Capacity: 2.5 liters
- Water Tank Capacity: 20 liters
- Covered Area: 400 m²
- Liquid Consumption: 1-72ml/min
- Water Consumption: 185ml/min
- Dimensions: 785 x 495 x 600mm
- Weight: 52kg
