
SMOKE MACHINE WITH VERTICAL JET

High power vertical smoke jet machine.

Reference: ZZJET3500

3500W Vertical Jet Smoke Machine

An extremely powerful vertical jet smoke machine. It generates a geyser-like column of smoke up to 15 meters high. The flow is illuminated by 35 RGBA LEDs to make the effect even more spectacular. This machine is particularly recommended for concerts and large events, connected in sync with other machines to create exceptional and unique smoke effects.

Technical Specifications

- Power: 3500W
- Heating time: 7 min
- Reheat time: 0-8 sec
- LEDs: 35 pieces of 8W RGBA 4 in 1

- Output: 700 m³/min
- Fluid tank capacity: 3.6 liters
- Maximum effect height: 15m
- DMX control
- 8-key remote control included
- Dimensions: 480 x 390 x 310mm
- Weight: 21.3kg

Attention!

The correct liquid to use is the model [ZZNF502](#) as it adheres to the formula PROPYLENE GLYCOL 33-35%, distilled water 65-67%. All other liquids that do not adhere to this formula cannot be used as they would damage the machine over time.
