
BIOETHANOL FLAME THROWER EFFECT WITH VERTICAL HEAD

Flamethrower machine for large events, maximum height of the effect 10 meters

Reference: SF-90

Flamethrower machine with extraordinary power, 10 meters of effect, suitable for large events and large stages, for outdoor use (IP55) generates a fountain of flames that can be controlled in height. Uses Isopropane and bioethanol as fuel for the generation of flames, machine for professional use.

Technical specifications:

Power: 300W

Power supply: 200 / 240V 50 / 60Hz

Control: DMX

Fuel tank capacity: 5 liters

Direction of effect: vertical

Fuel consumption: 30-60ml per second

Flame ignition: High voltage electronic ignition

Dimensions: 330 x 260 x 345mm

Weight: 14Kg
