ACTIVE SPEAKER 6.5" BATTERY OPERATED

Compact and versatile all-in-one battery-powered speaker.

Reference: ZZIGGY

Versatile and Compact All-in-One Battery-Powered Speaker

ZZIGGY is a new ALL-IN-ONE system ideal for applications that require easy portability combined with rich and powerful sound. It is a highly functional and extremely easy-to-use speaker that can be controlled from any mobile device via Bluetooth in seconds. The built-in battery allows for hours of music playback in any context. In addition to wireless connectivity, it features 2 inputs that can be connected to any source, whether it's a microphone, line input, or high impedance.

The internal DSP allows for adjustable reverb effects, ensuring optimal sound even in live situations, such as guitar and vocals.

With ZZIGGY, music is truly at your fingertips.
