Reference: ZZMXPRO24

Professional Mixer with DSP Multieffects and Bluetooth

The ideal solution to have everything under control. Great for both fixed installations and versatile for mobile applications, they can easily handle microphones for theatrical performances or inputs for a band's concert.

The **2 AUX outputs** guarantee excellent autonomy for live performances as well as connectivity for outboard equipment in the studio. Internal effects, **Bluetooth connection**, integrated sound card, and MP3 player complete the range of features of these powerful and versatile mixers.

Compact analog mixer with 32-bit DSP and integrated full-duplex sound card, 99 effects, Bluetooth connectivity, and media player. 4 selectable auxiliary output groups with matrix selector. 9-band equalizer on the master. +48V phantom power supply.
