
UHF RECEIVER 1X100 CHANNELS 515-565 MHZ

UHF RECEIVER 1X100
CHANNELS 515-656 MHZ

Reference: TXZZ710

UHF RECEIVER 1X100 CHANNELS 515-656 MHZ

The TXZZ710 microphone receiver represents the forefront of audio technology thanks to its innovative combined PLL UHF technology. Equipped with 100 channels operating in the UHF frequency range from 515 to 565MHz, this device offers unparalleled flexibility to adapt to different situations and environmental conditions. It ensures reliable and high-quality audio transmission, making it the ideal choice for industry professionals and enthusiasts seeking superior performance and versatility in any context.

TECHNICAL SPECIFICATIONS

- Type: Single Receiver;
- Channels: 100 x 1 UHF;
- Frequency Range: 515-565 MHz;
- Display: LCD with frequency indication;
- Squelch: Yes;
- Technology: ACT/IR SYNC;
- Frequency Response: 50 - 18000 Hz;
- RF Power: <30 mW;
- Bandwidth: 50 MHz;
- Sensitivity: >60dB;
- IR Transmission Window;
- DC Input: DC 12 V, 800 mA;
- Unbalanced Output: 6.35 mm;
- Balanced XLR Output;
- Antenna;
- Dimensions: 250 x 51 x 51 mm;
- Weight: 965 g
