HANDHELD RADIO MICROPHONE FOR TXZZ7XX SERIES RECEIVERS

HANDHELD WIRELESS MICROPHONE FOR TXZZ7 SERIES RECEIVERS WITH INTERCHANGEABLE SHURE CAPSULE

Reference: TXZZ7HTS

HANDHELD WIRELESS MICROPHONE FOR TXZZ7 SERIES RECEIVERS WITH INTERCHANGEABLE SHURE CAPSULE

A superior quality transmitter that captures every frequency with detail, even in the most difficult environmental conditions. It offers excellent presence and clarity not found in other devices in the same price range. Compact and easy to use, it provides excellent audio quality.
The extreme scalability of the system allows for dozens of different configurations to satisfy even the most demanding customers.
The interchangeable microphone capsule allows the transmitter to be adapted for various professional applications, by choosing from capsules with different polar characteristics. The range of configurations in the TXZZ7XX series is particularly comprehensive and allows any user to choose the most suitable combination for their specific needs.

Can be fixed to a stand using a clip: MSZZ046
