
16-CHANNEL BELT TRANSMITTER WITH BODYPACK

BODYPACK WITH BOW FOR
TXZZ6 SERIES

Reference: TXZZ6PT

Bodypack transmitter with headband

High-quality transmitter for detailed shooting of each frequency even in difficult environmental conditions.

Provides extraordinary presence and clarity impossible to find in other devices in this range of price. The receiver is rugged and offers unmatched linearity comparisons thanks to the true diversity system with antennas mounted on BNC connector.

The range of outputs is specifically designed to please even the most demanding customers. The range of configurations of the TXZZ6 series is particularly complete and enables any user to choose the most suitable combination for own particular needs.
