
16-CHANNEL UHF RADIO MICROPHONE SET. BODYPACK TRANSMITTER

UHF 16CH HEADSET
WIRELESS MICROPHONE SET

Reference: TXZZ601

Wireless microphone set with bodypack transmitter

High quality transmitter for a detailed recording of each frequency even in difficult environmental conditions.

It provides extraordinary presence and clarity not found in other devices in this price range. The receiver is rugged and offers unmatched linearity, true diversity system with antennas mounted on BNC connector.

The range of outputs is specifically designed to satisfy even the most demanding customers, with the possibility of taking the single channel or the mix of CH1 and CH2.

Technical specifications

- 16 UHF channels 673-697.80MHz
- Information display
- Auto squelch circuit
- True-Diversity system with detachable high-extension antennas
- Unidirectional dynamic capsule for crystal clear sound
- XLR output, balanced
- 6.3 mm unbalanced jack output
- Efficient and energy-efficient construction
- Range of about 50m (may be influenced by external factors and the battery charge level)
- Transmitter supplied
- 1 audio cable included
- 2 1.5V AA batteries supplied
- Carrier frequency range: 673 - 696.775 MHz
- Frequency response: 100 -18000Hz
- THD: < 1 %
- MSR: >100dB
- Operating temperature: -29 - 74°C
- S/N Ratio: >70dB
- Output level: 0-300mV
- Sensitivity: -105dB
- Dimensions: 394 x 205 x 52mm
- Headband and necktie microphone included

Transmitter

-
- Modulation: FM
 - RF out: >10dBm
 - Maximum deviation: +/- 70KHz
 - Power supply: 2 AA 1.5V batteries
 - Dimensions: 250 x 51 x 51mm
