
ACTIVE SUB SYSTEM + ACTIVE SATELLITE

430W RMS SUB + SATELLITE
bi-amplified system

Reference: ZZEPHYRUS200

Amplified Subwoofer + Satellite System

The new modular and customizable audio systems represent the perfect combination of quality and versatility. Each user can create their own system according to their specific needs.

The modules come prewired, and the connection simplicity is absolute. Ideal for those who need to set up a high-quality system in a limited space with extremely fast installation times.

With ZZEPHYRUS200, simply stack the modules, and you're immediately ready for great sound. The extreme versatility is complemented by a DSP that allows you to get the most out of each module.

The SUB module can be positioned both vertically and horizontally, while the satellite housing and connection simplicity remain the same regardless of the chosen configuration.

Technical Specifications

- 10" woofer in a bass reflex enclosure
- Frequency response: 47 - 20,000Hz
- RMS power: 430W
- Bi-amplified system in Class D
- 24-bit, 96kHz DSP
- 3 EQ presets: Speech, DJ, Live
- Bluetooth connectivity
- Internal limiter
- Robust, scratch-resistant MDF cabinet
- SUB dimensions: 300 x 390 x 495mm
- SAT dimensions (module): 475 x 85 x 115mm

The SUB, thanks to the provisions on its two sides, can be installed either vertically or horizontally.

When combined with the ZZEPHYRUS200SUB, it unleashes unprecedented power for this type of system.

ATTENTION: ZZEPHYRUS200 consists of 1 sub module + 1 satellite module (in 3 sections). The configuration with dual SUB requires the OPTIONAL addition of ZZEPHYRUS200SUB.
