
TELESCOPIC STAND FOR HEADLIGHTS. HARD ALUMINUM VERSION

TELESCOPIC LIGHT STAND
up to 3.25m height

Reference: LSZZ104

TELESCOPIC STAND FOR LIGHTS height up to 3,25m

Compared to speaker stands, those designed for lights have slightly lower load capacities but can reach much greater heights. The LSZZ series light stands strike the perfect balance between strength and lightweight construction. They feature three support points for maximum stability and weighted bases for enhanced safety. There is a great selection of models available based on load capacity, height, and budget. All stands include a horizontal "T" bar for mounting lights.

- Material: Steel
- Adjustable height with 7 levels from 1450 to 3250mm
- Maximum load capacity: 30kg
- "T" bar: 4 attachments
