

VHF 197.15MHZ RADIO MICROPHONE SET, HANDHELD

Fixed frequency VHF
wireless microphone

Reference: TXZZ203

Fixed frequency VHF wireless microphone set with transmitter.

Latest generation chip designed for optimal signal output.

Ideal in all those situations where an essential and at the same time reliable and robust product is required.

FM modulation with crystal clear frequency response and very low distortion levels.

Features:

- handheld radio microphone with unidirectional dynamic capsule
- Fixed frequency 197.15MHz
- Information display
- Automatic squelch circuit
- Balanced XLR and unbalanced 6.35mm Jack outputs
- Audio cable supplied
- 2 1.5V AA batteries included

Frequency Response	40-20000Hz
THD	
MSR	>100dB
S / N ratio	>100dB
Exit level	0-300mV
Sensitivity	-105dB
RF out	>10dB
Maximum deviation	+/- 70KHz
Modulation	FM
Dimensions (receiver)	210x145x42mm
