
12 "AMPLIFIED CASE WITH MONOBLOCK POLYPROPYLENE CABINET, 350W

Amplified acoustic speaker with SINGLE PIECE polypropylene shell with 12 woofer and 800W peak power.

Reference: ZZEUS312

12" Powered Speaker

The new concept of power applied to one of ZZIPP's top speakers. New Class D digital amplifier, completely redesigned enclosure to offer an even deeper and immersive listening experience. The perfect choice for those who want to combine power, audio quality, and material durability.

The ZZEUS3 series highlights the essential elements to become the benchmark in active PA systems. The new operating presets can be recalled by pressing a button on the back of the speaker, no complicated adjustments. A single gesture allows for simple and instant DSP configuration. The Bluetooth function has also been completely revised, integrating the TWS feature for wireless connection of 2 speakers. The maximum power combined with maximum user-friendliness.
